ASHEN MADUSANKA BAMUNUSINGHE

- Software Engineer Internship Full Stack Development-

Location: Kurusahandiya , Panadura **Phone:** +94 76 695 4545
Email: ashen0217@gmail.com **GitHub:** Github.com/ashen0217
LinkedIn: Linkedin/Ashen Bamunusinghe **Medium -** medium.com/@ashen0217

About Me

I am an Information Technology undergraduate with a strong passion for creating innovative software solutions that enhance organizational efficiency and productivity. I had nearly 2 years of project experience and currently on 3rd year at SLIIT. And also recognized for solving complex problems and developing innovative web applications that align with business needs. Proven track record of crafting resilient solutions. Thrives in collaborative environments and welcomes new challenges. There are 50+ industry based proven project source codes that I already uploaded to my GitHub account.

Experience

Member of MS Club of Alpha Jan 2025 - June2025

- **Collaborated with development project related to mini hackathon**

Freelance Software developer Jan 2023 – Mar 2023

- Delivered projects on time while maintaining clear communication and client satisfaction throughout the development process. Conducted thorough analysis to understand user requirements, ensuring deliverables met expectations.

Education

Sri Lanka Institute of Information Technology(SLIIT) Sri Lanka , Malabe *Bachelor of Science in Information Technology* *2023 - Present*

Anuradhapura Walisinghe Harischandra College, Matara, Sri Lanka *2020 - 2022*
G.C.E. Advanced Level – Engineering technology Stream
Results: Engineering technology (S), SFT (B), ICT (C) | ZScore +0.9203

Esoft Regional Campus Anuradhapura 2020
Diploma in Information Technology
Results – 178/200 Marks / Rank – 3rd Place

Anuradhapura Walisinghe Harischandra College 2013
- 2018 G.C.E Ordinary Level Results – 8A's , 1B

Projects

Sentiment Analysis Project – *AI & ML Project*

The app classifies text input (likely user reviews or comments) into sentiment categories using a trained ML model.

- Data Pre-processing: Handled in helper.py, including SMOTE oversampling to balance the dataset.
- Logging: logger.py manages logs for debugging and tracking model behavior.
- Model Experiments: Stored in the notebooks/ folder—great for iterative development and testing. Technologies: Python and python libraries such as Numpy, pandas , Django/ Jupyter notebook / GitHub: https://github.com/ashen0217/Sentiment_Analysis_Project

Play zone Management System – *Full Stack Web App*

- Manage an indoor play zone facility. This system handles user registration, booking slots, staff management, equipment tracking, and much more.
- Developed full-stack web application with role-based access control, secure authentication, payment gateway integration, and QR code ticketing.
- Features - Customer Registration & Login / Booking and Slot Management / Staff & Employee Management

Technologies: Mongo Db, Express, React, Node Js, REST APIs, MVC Architecture GitHub:
https://github.com/ashen0217/PlayzoneManagementSystem-By-MERN-Stack

Finance Tracker App – *mobile application*

- A modern Android application for tracking personal finances, managing expenses, and visualizing spending habits. This app helps users stay on top of their financial goals with intuitive features and a userfriendly interface.

Features - Add, edit, and delete income and expense transactions / Categorize transactions for better insights / View detailed statistics and spending charts / Set monthly budgets and track progress Technologies: Android/kotlin , Firebase
GitHub: https://github.com/ashen0217/Finance-Tracker-App-FinTech

Online Staff Management System – *Web application |JSP Type*

An Online Staff Management System is a digital platform designed to streamline and automate various aspects of workforce management. It enables businesses and organizations to efficiently handle employee records, attendance, payroll, scheduling, performance tracking, and communication—all from a centralized, cloud-based system

Core Functionalities - Add, update, and delete employee information / Monitor and record employee attendance. Technologies: Java / MySql / JSP Servlet / MVC Architecture
GitHub: https://github.com/ashen0217/OnlineStaffManagementSystemBy-JAVAJSPServletWebsite

Contact Management System – python applet

A simple applet developed to manage Contacts ◦ Add new contacts with CRUD operations.

◦ View the contacts.

◦ Update and delete the contacts.

Technologies: Python's Tkinter library for the GUI , SQLite for the database
GitHub: https://github.com/ashen0217/Contact-Management-System-By-Python

Technical Skills

- **Programming Languages:** Java, Python, PHP, JavaScript, C#, HTML, CSS, C, C++, R, SQL
- **Frameworks/Libraries:** React.js, Node.js, Express.js, Spring Boot, .NET, Angular, LangChain, Jest x s
- **Databases/Cloud:** MySQL, MongoDB, PostgreSQL, Firebase, AWS
- **Mobile Development:** Flutter, Kotlin
- **Tools:** Git, GitHub, Docker, Linux, Figma, REST APIs, MVC

Certifications

- Certificate in Python - University of Moratuwa (2022) - Python basics to advance **Link:-** View Certificate
- Certificate in JavaScript- Alison free courses - JavaScript basics to advance **Link:-** View Certificate
- Certificate in Java – Alison free courses - Java basics to advance **Link:-**View Certificate
- IBM Data Science Udemy course **Link:-**View Certificate
- Statistics Expert Udemy course **Link:-**View Certificate
- Spring Ai with Java **Link:-**View Certificate

Professional Skills and Interests

- **Professional Skills:**Problem-solving, Communication, Teamwork, Adaptability, Time Management, punctuality
- **Interests:**Web Development, Mobile App Development, Full-Stack Engineering, Data Engineering, AI
